

INSTALLATION GUIDE

Claude Code in Visual Studio Code

A step-by-step guide to installing VS Code and connecting Claude Code with your company login.

How to read this guide

Every screenshot has **red markers** showing exactly where to click. When a screenshot has more than one marker, click them in the order of the numbers.

PART 1

Install Visual Studio Code

Already have VS Code installed? Skip ahead to Part 2.

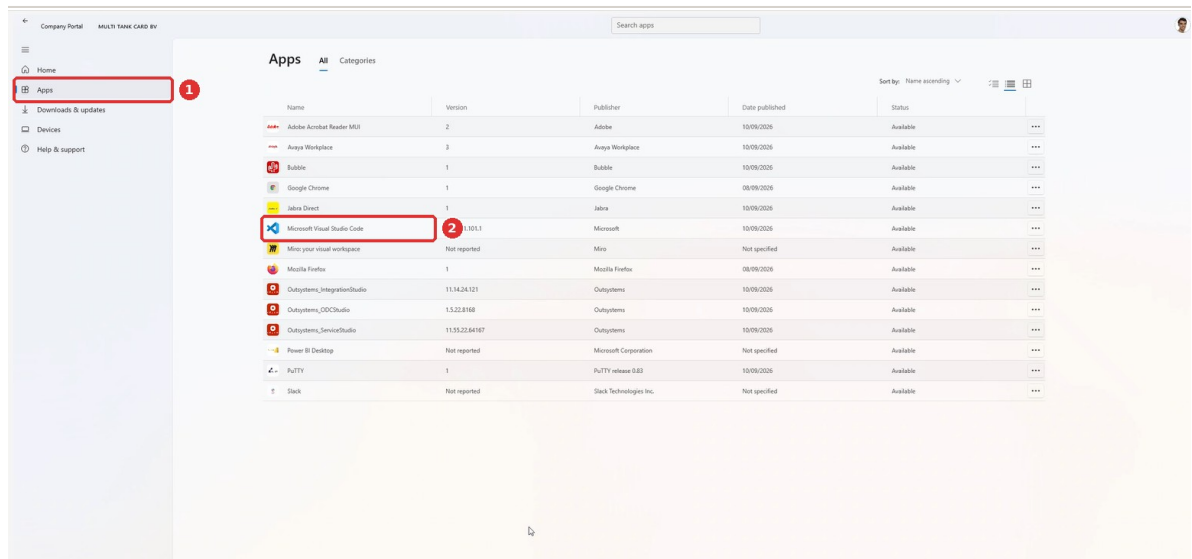

1

Open **Company Portal** (called **Bedrijfsportaal** on a Dutch-language Windows).

2

Go to **Apps** and click **Microsoft Visual Studio Code**.

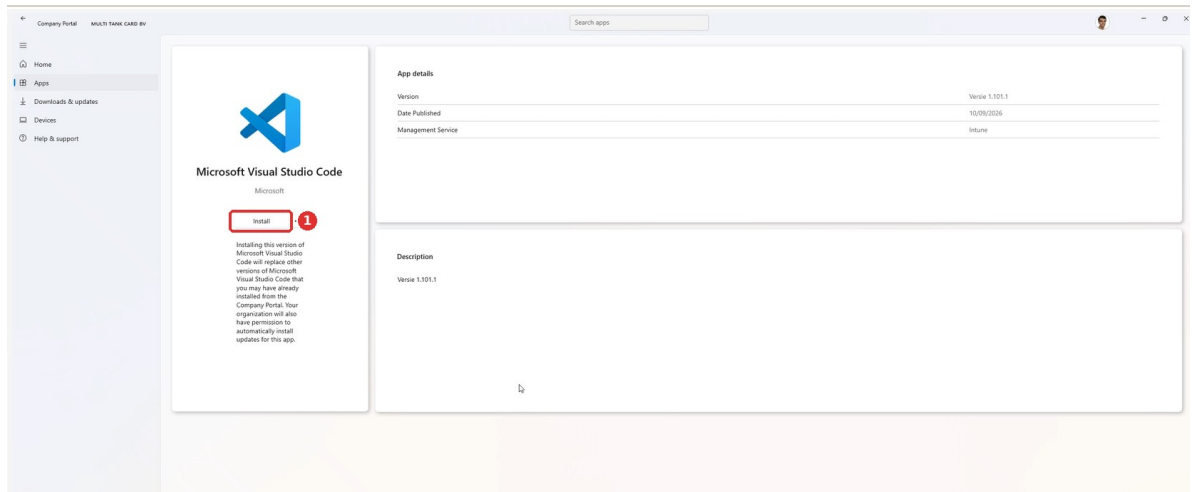

Click: **1** Apps **2** Microsoft Visual Studio Code

3

Click **Install** and wait for the installation to finish.

Click: **1** Install

PART 2

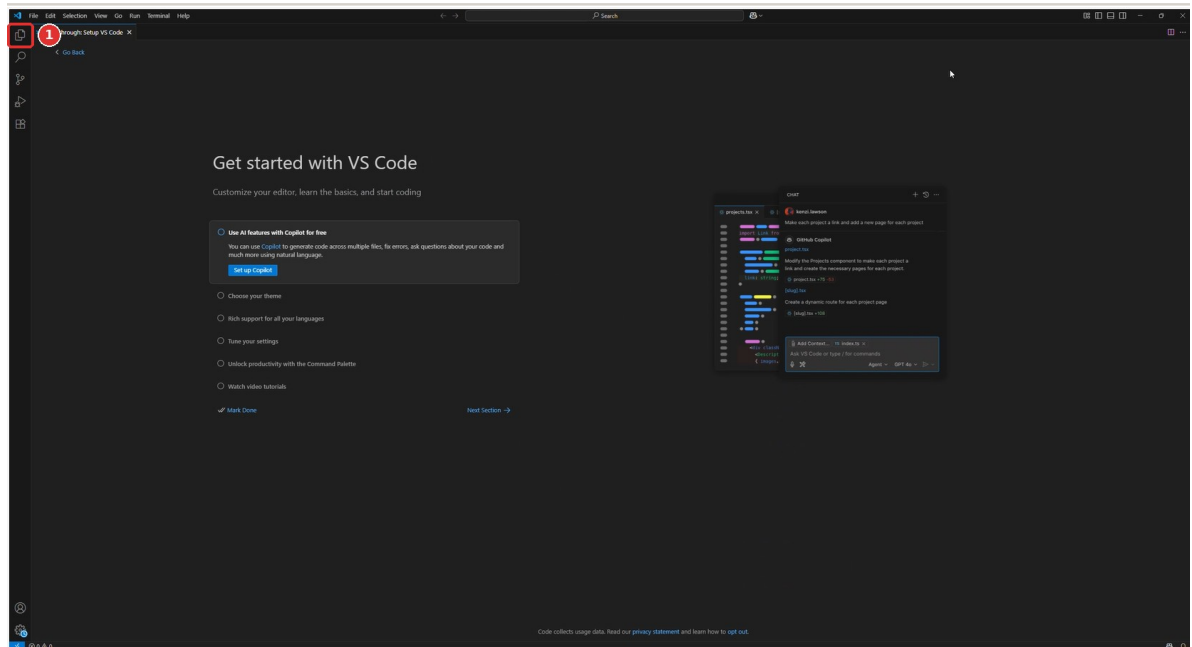

Set up Claude Code

Open VS Code once the installation has finished.

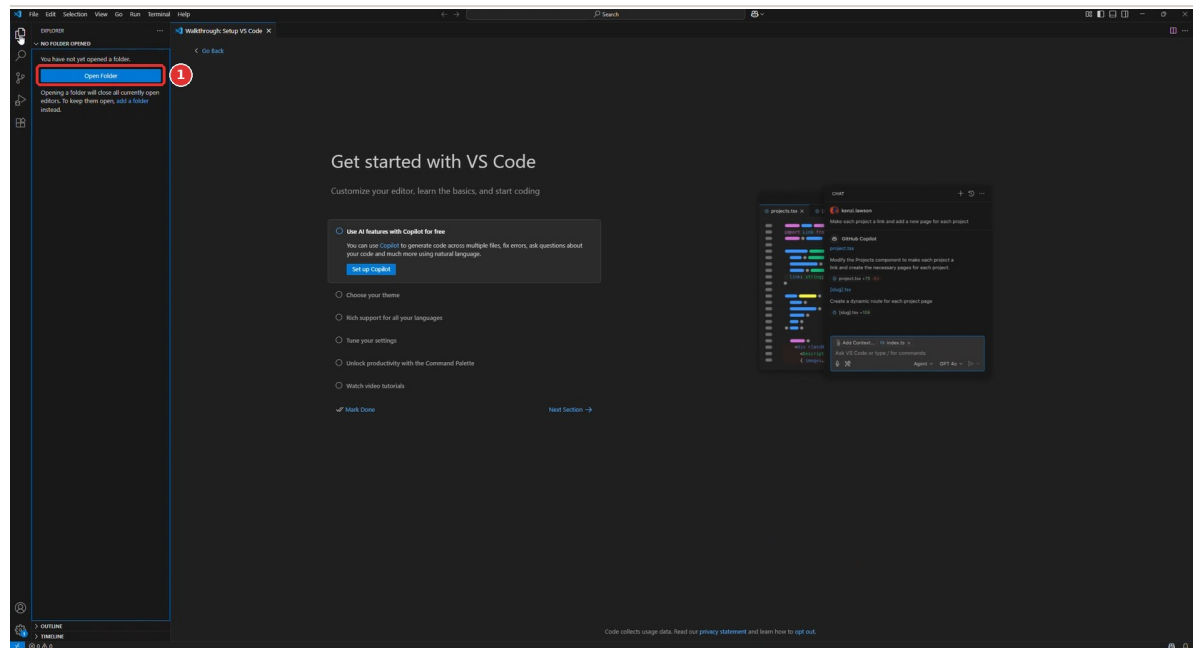

1

Click the **Explorer** (folder) icon in the top left.

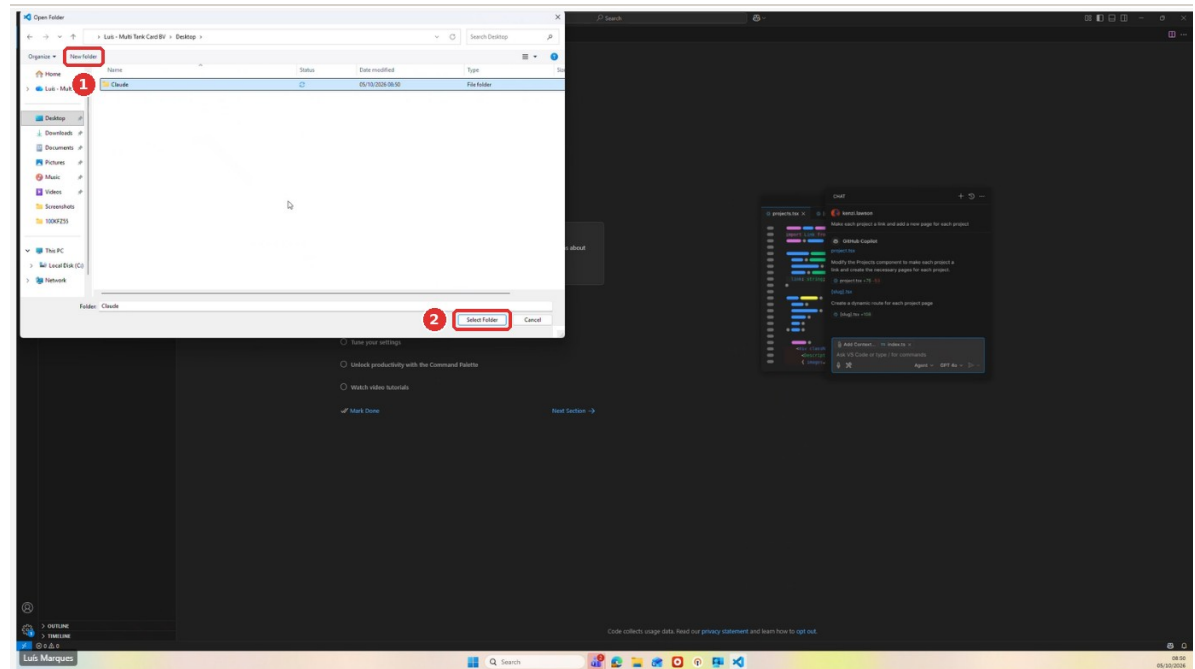

Click: **1** Explorer icon

2

Click **Open Folder**.Click: **1** Open Folder

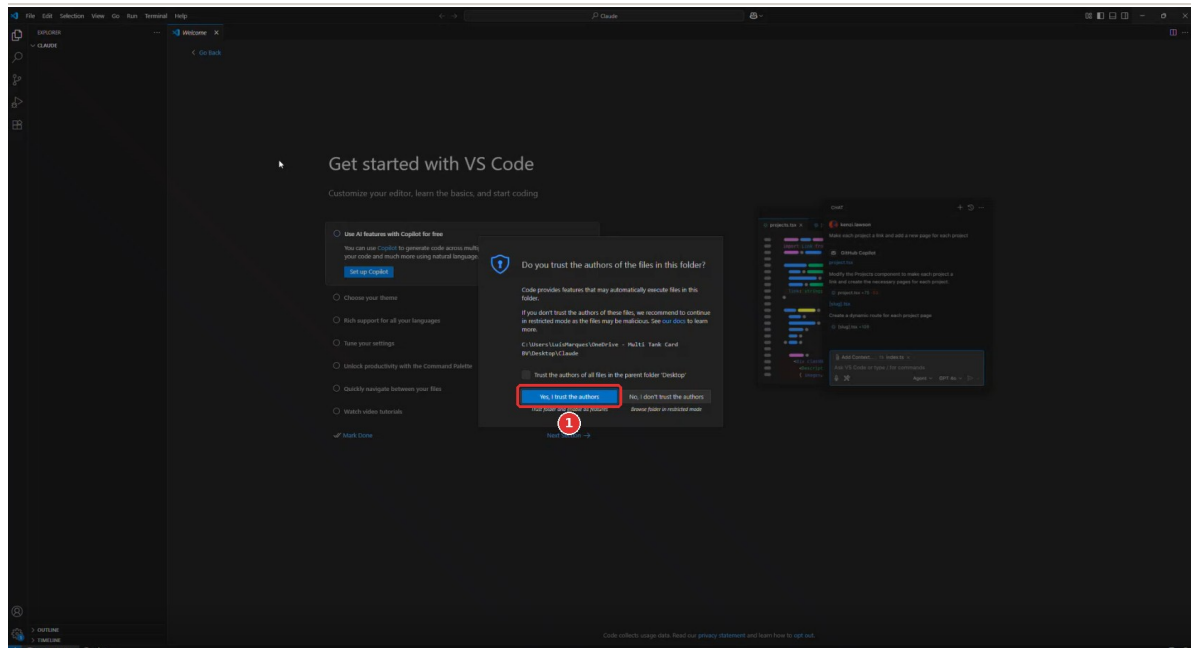

3

Create a new folder somewhere easy to find, for example on your Desktop. Select it and click **Select Folder**.Click: **1** New folder **2** Select Folder

4

If VS Code asks, click **Yes, I trust the authors**.

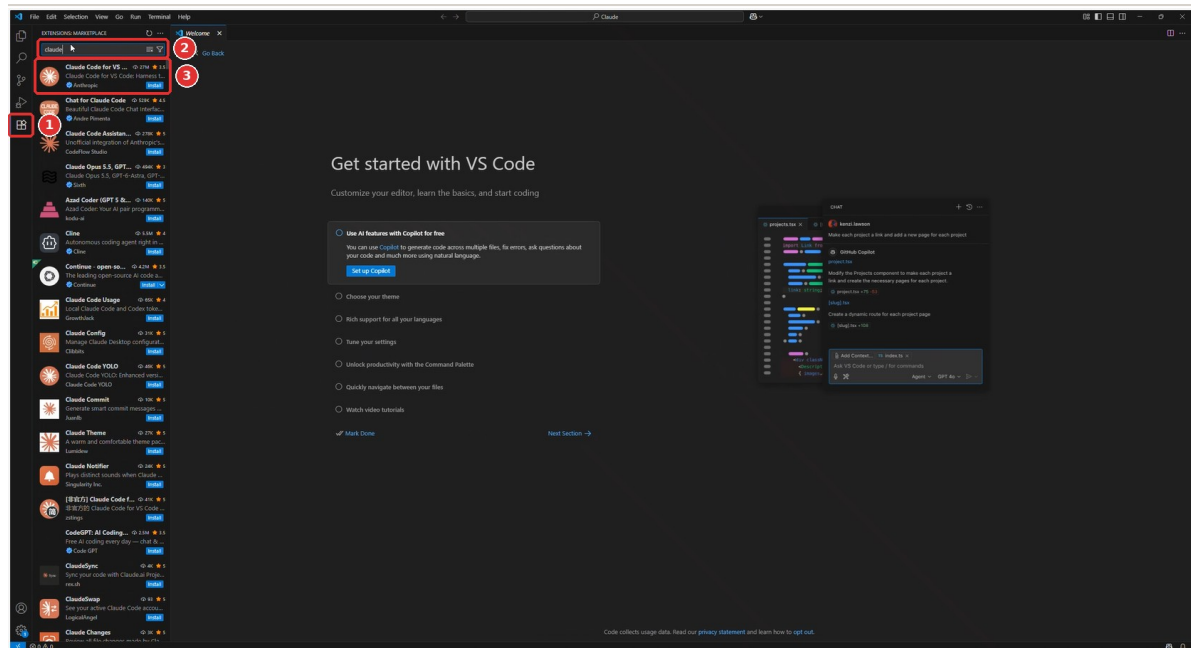

Click: **1** Yes, I trust the authors

5

Click the **Extensions** icon and search for **Claude Code**. Install **Claude Code for VS Code** by Anthropic (the one with 27M+ installs). Trust the publisher if asked.

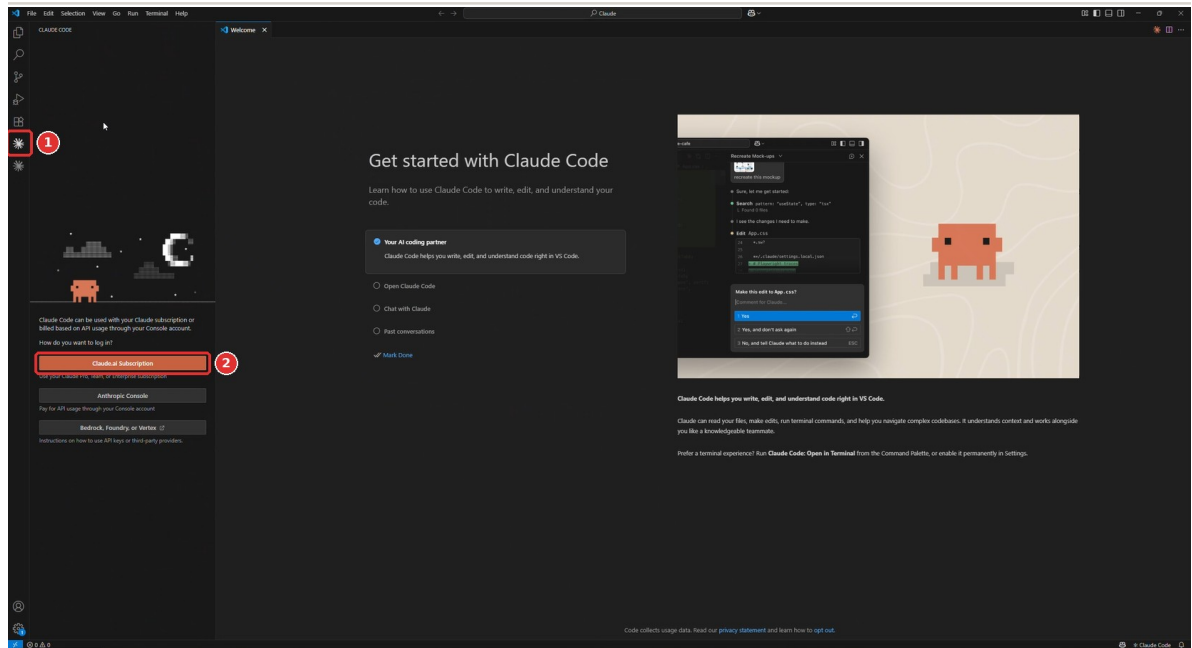

Click: **1** Extensions icon **2** Search "claude" **3** Install Claude Code for VS Code

6

Click the new **Claude** icon in the left-hand bar, then click **Claude.ai Subscription** and follow the screens to log in with SSO.

Click: **1** Claude icon **2** Claude.ai Subscription

You're all set — happy Claude coding! 🎉

Claude Code is now ready to use inside VS Code.

Mind the security risks

Only open folders and trust authors you know, and always review the changes and commands Claude Code proposes before you accept them.
